

# A Waterproof Home can become a Reality

Numerous homes on the Coast encounter humidity and dampness problems. Resulting in a lower property evaluation, health problems and odours. The correct waterproofing in your home is something so indispensable and in most cases we take it for granted that it was part of the build.

In some cases, developers or contractors do not address this problem due to additional costs and an increase in the time frame for construction. In addition, humidity and dampness can surface several years after completion and full contractors payment, so complaints are ignored. To prevent future problems of humidity and dampness in your home, ensure that you contract a company with the necessary professional experience, required training and skills. The additional cost can only add value to your long-term investment.

VIP Homes offers different types of waterproofing and certifies a written 10 year guarantee. We are supported by the experience of qualified professionals with over 15 years of exclusive dedication in the market.
